
These guidelines for COVID-19 Patients in Home Isolation and Preventive Measures for self care are based on leads from classical Ayurveda & Unani texts, outcome of research studies, Report & Recommendations of the Interdisciplinary Committee and which will further strengthen our fight in combating COVID-19 in the emerging situation.

These Guidelines and Advisories were developed through extensive consultative process by Empowered Committee within the Interdisciplinary Ayush Research and Development Task Force setup by Ministry of Ayush. The Project Monitoring Unit for COVID-19 Studies, Central Council for Research in Ayurvedic Sciences (CCRAS), Central Council for Research in Unani Medicine (CCRUM), All India Institute of Ayurveda (AIIA) and National Medicinal Plant Board (NMPB) of this Ministry worked on formulating the advisories and Guidelines.

The present Guidelines and self care measures provide clear guidance to Ayurveda & Unani practitioners regarding treatment of COVID-19 patients in different conditions of infection. This brings in uniformity and consistency in the Ayush-based responses to the pandemic across the country. It also helps State/UT Governments to plan and incorporate these solutions into the COVID-19 management activities being deployed on the ground. Furthermore, these measures and guidelines contribute to the mainstreaming of Ayush solutions for the management of COVID-19, and will be immensely beneficial to the public since these solutions are easily accessible and will help to alleviate the hardships brought in by the pandemic.

These are aimed to increase awareness among the citizens regarding the effective home care solutions and recommended Ayush practices, to help them to enhance their immunity along with standard guideline for Ayurveda & Unani Practitioners
for management of prophylactic, Asymptomatic and Mild cases of COVID-19 during home isolation. Ministry of Ayush issued an advisory on 29.01.2020 on how to protect oneself from COVID-19 and how to stay healthy. In this context, Ministry of Ayush has also promoted use of ready-made formulation like ‘Ayush Kwath’ (Ayurveda) which is a simple admixture of four herbal ingredients which are well known in India and outside India for their immunomodulatory and anti-viral activities along with several other health benefits. Considering the seasonal changes, patient’s constitution it has been advised that Vasa (Malabar nut), Yashtimadhu (Liquorice root) and Guduchi (Giloy) may be added to the Kwatha as per requirement.

Keeping note on the present public health challenges due to second wave of COVID-19 pandemic, there is an urgent requirement to disseminate information about the Guidelines for Ayurveda & Unani Practitioners for the management of COVID-19 patients during home isolation. The effective evidence based Ayurveda and Unani formulations/measures such as AYUSH-64, Ashwagandha tablets etc. have been included for the management of Asymptomatic and Mild cases of COVID-19 during home isolation.

These guidelines are provided as separate documents on the Ayush Ministry’s website. Further, similar guidelines based the other Ayush systems are expected to be released shortly.
